

Spotting wildlife with the Oberwerk 25x100 CF Deluxe on the Oberwerk 5000 Series Tripod/Head

The Oberwerk Deluxe Series includes the 10x50, 15x70, 20x80mm, and the 25x100mm CF, all with convenient center-focus, and the 20x65 ED and 25x100mm IF, which have precise individual focus. These binoculars offer serious light-gathering power, with excellent image quality- for a surprisingly-affordable price. They are ideal for amateur astronomy, as well as long-range terrestrial viewing. The relatively-compact 20x80 Deluxe III also has a triplet objective design, which limits the CA (chromatic aberration) that would normally be present in such a short focal length instru-

ment, while the 20x65, with ED objectives and a longer focal length, completely eliminates CA. Of course they are all fully broadband multi-coated, waterproof, and nitrogen-filled. The Deluxe Series binoculars feature very rugged construction, with a rubber-armored metal body. The 65mm, 80mm and 100mm models have a built-in mount, which connects directly to your tripod head's quick-release plate. Includes objective and ocular caps, and our new Heavy-Duty aluminum-frame case, except for the 8x42 and 10x50, which come in a rugged soft case.
