

OBERWERK

High-Performance Optics for Earth & Sky

Dear Oberwerk Customer,

Because the Oberwerk BT-100XL-ED binocular objective barrels are so close together, Seymour Solar Filters for this model are modified- the aluminum cell is ground down in one area to allow the filters to fit between the two closely-spaced barrels. This thinner area is marked with a black dot on the face of the filter. Align the two dots together, then slide the filters at the same time onto the binocular's glare shields. Installing one, then the other is more difficult. Enjoy viewing the sun!
